### Company Description:

Dip-Tech is the leading provider of digital ceramic glass printing technology, including the world's best digital glass printers and widest color gamut of digital ceramic inks. Dip-Tech has revolutionized digital printing on glass, enabling exciting new capabilities and business opportunities for glass processors by complementing its glass printing machines with customer support and unmatched business development. Dip-Tech glass combines art with functionality, and can be found in the interior and exterior of some of the most iconic structures across the globe.

### Job Description and Tasks:

#### Technical writer;

Write easy-to-understand user interface text, troubleshooting documents and technical guides for customer's usage. Work with internal teams on product and documentation requirements:

- Determine the needs of end users of technical documentation.
- Study product samples and talk with product designers and developers.
- Organize and write supporting documents for products
- Use photographs, drawings, diagrams, animation, and charts that increase users' understanding
- Select appropriate medium for message or audience, such as manuals or online videos
- Standardize content across platforms and media
- Revise documents as new issues arise

### Essential Requirements:

- *Technical skills; must be able to understand and then explain technical information. (e.g. Engineering students)*
- *Communication skills: must be able to take complex technical information and translate it for consumers who have sometimes nontechnical backgrounds.*
- *Detail oriented; must be detailed and precise at every step so that the instructions can be useful.*
- *Teamwork; must be able to work well with others.*
- *Excellent written skills in English*
- *SOLIDWORKS acquaintance – is an advantage*

### Remuneration Details:

Covering lunch and transportation expenses of the interns.
