**Company Description:**

**Company Overview** – Impact First Investments is Israel’s first impact tech venture fund. Impact First Investments seeks to leverage Israeli technology and innovation to create globally scalable social impact. Impact First and its investors aim to achieve both social and financial returns by investing in viable companies that provide technological solutions to global social and environmental challenges. Our portfolio currently includes 7 seed investments in healthcare, SaaS, and marketplaces. Our impact tech methodology has been praised by global investors.

**Our investment philosophy** – We believe that impact investing in technology can lead to the most important solutions of our lifetimes. We strive to leave a better world for generations to come through critical investments today, and do so by leveraging the immense power of business to solve some of the world’s greatest challenges. By investing in Israeli high-tech companies that yield competitive financial returns alongside measurable social and environmental impact, our portfolio generates the greatest ROI of all: positive change for millions of lives today and infinite lives in the future.

**Job Description and Tasks:**

- Learning the ins and outs of our impact investing and measurement methodology, and further improve our existing tools.
- Performing a deep dive into our startups financial and impact KPIs and update impact analysis and reports.
- Conducting industry and company-level research of new impact tech startups by liaising with founders. Performing comprehensive impact analysis, including financial and impact modeling.
- Performing, to the extent possible, other VC projects including screening/due diligence and/or writing thought-leadership pieces.
- Presenting analyses to our partners and startups.
Essential Requirements:

- Deep interest in and working knowledge of impact tech/impact investing/venture capital
- Financial, social impact or impact investing background preferred (through internships, coursework or extracurricular activities).
- Working on Bachelor’s degree in economics, finance, or business a plus; diverse backgrounds preferred. Master’s degree a plus.
- Strong analytical skills with ability to perform required analysis quickly and accurately. Advanced Excel and Power Point skills
- Excellent organizational and communication skills, both verbal and written
- High level of initiative and responsibility and with a dedication to quality
- Strong interpersonal skills with ability to work effectively in teams with diverse cultural and educational backgrounds
