### Company Description:

OrCam's mission is to harness the power of artificial intelligence by incorporating pioneering technology into a wearable platform which improves the lives of individuals who are blind, partially sighted, and have reading difficulties. OrCam MyEye 2.0, the company's flagship device, is tiny - the size of a finger – and includes a smart camera worn on a pair of glasses that instantly reads text aloud and recognizes faces, products, and money notes in real time. "OrCam is a life changing device, giving me independence and the ability to read again", says OrCam user Pedro Liz, a DJ at New York's WHCR 90.3 FM.

Powered by leading minds in the Computer Vision and Machine Learning fields, OrCam was jointly founded in 2010 by Prof. Amnon Shashua and Mr. Ziv Aviram, who are also the co-founders of Mobileye, the collision avoidance system leader and autonomous driving innovator, which was acquired by Intel Corp. in 2017 for \$15.3 billion.
